

INDOOR WOOD FIREPLACES

FIRE BY **escea.**

# Born in the deep south, where warmth really matters.

Escea fireplaces are designed and made in the deep south of New Zealand, the best place to test the limits of heat and efficiency.

Inspired by our backyard and driven by our purpose – to put a better fireplace at the heart of every home.

**MADE IN  
NEW ZEALAND**

**BEAUTIFUL WARMTH**

We don't compromise, and neither should you – that's why we combine high performance with unrivalled beauty.

**CRAFTED WITH CARE**

From concept to completion, our people take pride in every fireplace they have a hand in making.

**DESIGNED FOR YOU**

Our fireplaces have been expertly designed to integrate seamlessly into your home and your lifestyle.

# Introducing Escea Wood Fires.

Throughout our 20 years' experience manufacturing fireplaces, we've applied our skill, passion and restless spirit to uphold our purpose - to put a better fireplace at the heart of every home.

Now using what we know best, we're debuting our very first range of wood fireplaces - with 21st century innovation and design.

Our Direct Vent Flue Technology creates a new generation of wood fires. By bringing all combustion air from outside you get less drafts, less smoke and less wasted heat - with better home performance, and integration with modern, sealed homes.

Ultimately, a better fireplace.

# TFS650

FREESTANDING WOOD FIREPLACE

A modern take on a classic fire, this square-style freestanding fireplace is ideal for smaller living spaces wanting high-impact flames and exceptional performance.

## SURROUNDS

### Frameless Trim

For use with non-combustible wall linings for a truly frameless look.

### Linear Fascia

A sleek painted steel finish to draw the eye for a framed view of the flames.

# Features

## DIRECT VENT FLUE SYSTEM

Unlike most traditional wood fires, all Escea Wood Fireplaces use Direct Vent Flue Technology, meaning that the room air and the firebox air don't mix. Combustion air is brought in and expelled via a dual flue system, while the room air operates on an independent heating circuit.

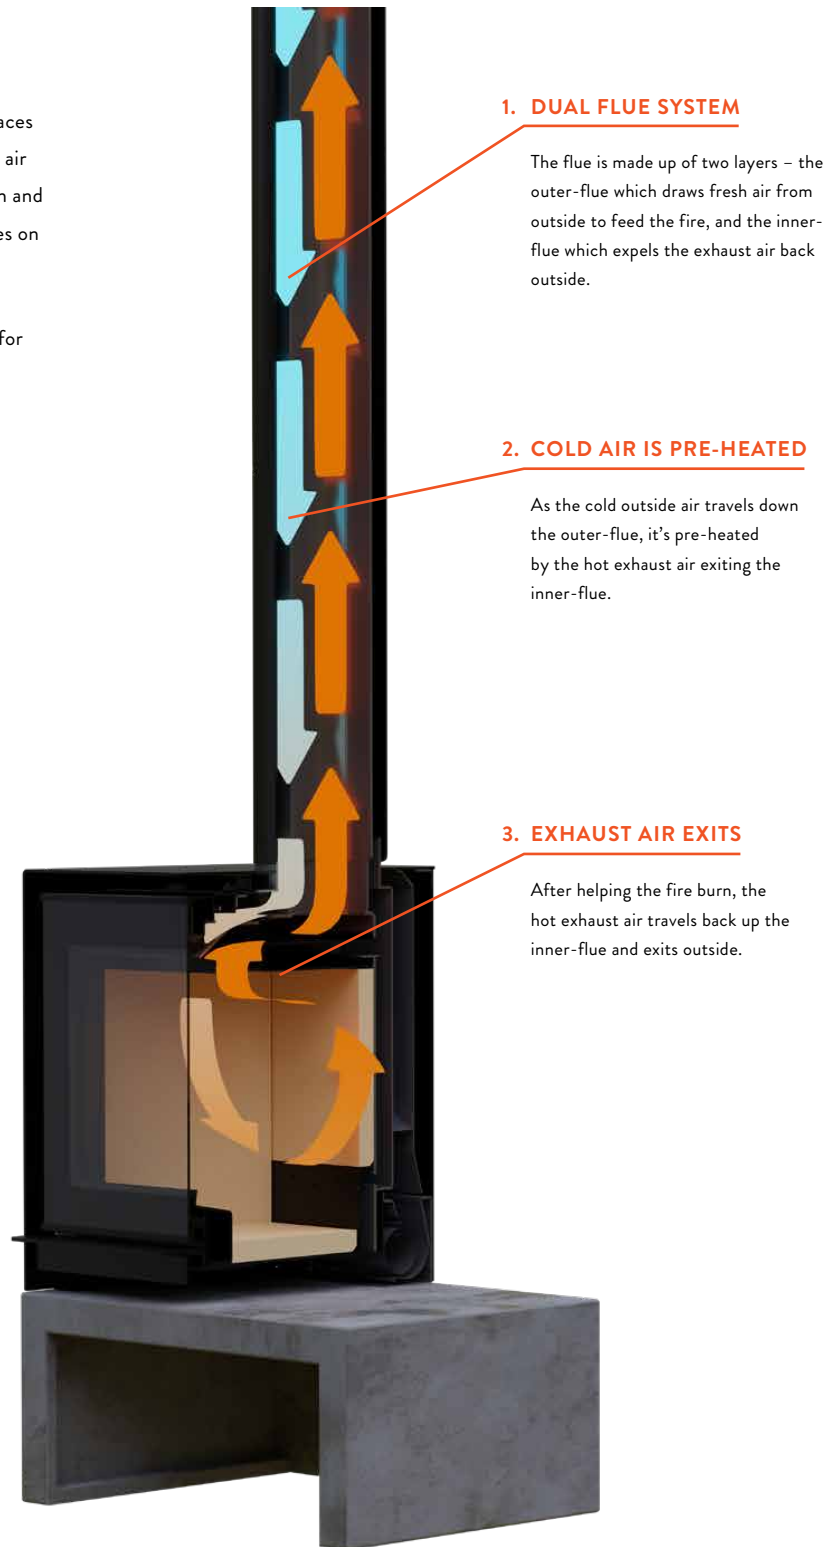

So, the heat stays in, and the smoke and fumes stay out, for greater overall home performance.

- Suitable for modern, airtight homes
- Draft-free operation
- Increased efficiency
- Maintains indoor air quality

Comes standard with all Escea indoor wood fireplaces.
